DSA Fleet Driver Trainers

All our instructors are the holder of a DSA Fleet certificate and have experience in most aspects of company driving.

Driver Risk Assessment

To assist you in meeting your Health and Safety requirements we can offer various occupational road risk assessments including in car and classroom based theory.

Eco Green Driving

Whilst helping your drivers to be safer on the roads we can provide training in greener driving which will help provide additional savings in both cost and downtime. Breakdown of vehicles and staff absenteeism should also be improved by this technique.

SAFED for Vans

If you have a fleet of vans, however small or large, we can offer you eco safe driving following the Safe and Fuel Efficient Driving (SAFED) sponsored scheme. See <http://www.safed.org.uk/>. SAFED is a Department for Transport supported scheme and funding and spaces are still available.

Advanced Driving

Should you have drivers who you wish to progress to advanced driver standard then NORDEV Fleet Driver Training can offer training for both the IAM (Institute of Advanced Motorists) or RoSPA RoADA (Royal Society for the Prevention of Accidents Advanced Driver Association). Advanced drivers have a much better chance of not being a road casualty.

Licence Verification Service

Can you be sure that your drivers all have clean licences? Do you make routine checks by visual inspection of licences? Can you be sure this is sufficient? We can offer an Independent checking service through DVLA.

What we can offer

NORDEV Fleet Driver Training can offer a wide range of in vehicle and classroom based training to help you improve your staff safety and efficiency. This will of course help to meet your health and safety requirements in respect of occupational road risk. Training courses can be tailored to every need and delivered anywhere in the country at a time and place to suit you.

Why not contact us to discuss your requirements?
